contact@dent-hub.co.uk

Venue: Dent Hub Academy

29 Brunswick Road, Gloucester

GL1 1JE

The **Aims** of this course and study days are for delegates to:

Develop understanding in Patient Assessment, evidence-based and patient-centred Treatment Planning for advanced restorative dentistry involving dental implants.

Develop knowledge in patient-communication, patient-education and to demonstrate their ability to effectively gain appropriate consent for implant dentistry.

Develop and demonstrate to an appropriate level, the skills and knowledge necessary in the safe placement and restoration of implants.

Learning outcomes

By the end of this certificate course, participants should be able to:

1. Clinically assess a patient's suitability for advanced restorative dentistry involving implants, by undertaking a risk-benefit analysis, to identify any physical or medical health issues that could make the patient unsuitable for implant surgery.
2. Communicate effectively with patients to ensure the patient is:
 - Fully informed about alternative treatment options along with the relative indications, contra-indications, prognoses and costs.
 - Fully informed about the advantages and disadvantages of using implant-supported restorations to restore the normal function and appearance of their dentition.
 - Sufficiently educated and informed to give valid consent prior to commencement of implant treatment.
3. Prescribe and undertake effective and necessary imaging of the mandible and maxilla with appropriate justification and reporting on the images and interpret the image and reports to inform the implant treatment.
4. Provide the necessary routine dental care or refer patients appropriately to ensure stabilisation of any dental caries, periodontal disease, endodontic diseases or occlusal issues prior to provision of implant dentistry.
5. Provide the necessary complex dental care or refer patients appropriately to ensure that any more significant and/ or higher priority oral health needs are managed appropriately, prior to provision of implant dentistry.
6. Establish and operate in a suitable environment and manage dental team members, to ensure appropriate conditions are met for surgical asepsis.
7. Safely and effectively raise mucoperiosteal flaps and suturing.

8. Safely and appropriately use exogenous bone or bone substitute biological materials for minor dentoalveolar augmentation for socket preservation prior to implant surgery or for augmentation required at the time of implant surgery.
9. Prescribe and apply appropriate pharmaceutical agents and medication in an evidence-based and safe manner.
10. Diagnose and appropriately manage complications occurring during or after implant treatment
11. Monitor and maintain implant-supported restorations and repair or replace any implant or prostheses as and when required.
12. Document and audit all clinical activity to an appropriate standard in line with current regulations and guidelines

Case submissions

Each delegate will submit 5 Implants cases each and will be asked to present and defend their cases, there will be oral examination about the submitted cases and delegates will be assessed for clinical competency, case presentations and regarding their core knowledge about the performed procedures, rationale of how they have managed the cases.

Reflective writing

Each delegate will be submitting reflective writing of 3000 words on the topic mutually agreed and they will be then assessed on their reflective writings.

BDS, MFDRCSI, FFDRCSI, FDSRCSEd, PG Cert Med Ed

FDTFRCSEd, FCGDent

PG Cert (Leadership, Coaching & Mentoring)

MSc Anti-ageing & Aesthetic Medicine

Course fee

£7995 plus VAT

The fee can be paid in instalments of £1000 each month for 9 months & £594 for 10th month. A deposit of £1000 should be made to secure the place in the course.

Course Venue

Dent Hub Academy training centre: 29 Brunswick Road, Gloucester, GL1 1JE

Parking is available on adjacent roads and St Michaels council car park is just around the corner.

Mentoring & Coaching

Each delegate will be performing 3 implant procedures under clinical supervision by tutors at the Academy venues. This is included in the course fee.

(The provided cases will be a mixture of the implant procedures; delegates cannot insist on specific type of cases only as the academy have to cater for different learning needs for different delegates and arranging only specific type of cases desired by the delegates may not be possible).

If the delegates want the tutors to visit their practices or if they want to perform more Implants procedures under clinical supervision, charges will apply.

Surgical courses abroad

Tutors arrange live patient based clinical courses abroad under their supervision, these courses provide opportunity to perform surgery under the supervision if delegates cannot arrange patients at their surgeries. Details of these courses can be found on our website; these courses are charged separately and are advertised periodically.

Registration & queries.
